-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-18, 20-24 and 26-30 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

3. Components C) and D) are seen to overlap in scope with one another. One compound can fall within the scope of each claimed component. As such, it is unclear as to how many ingredients are in the composition.

Claim Rejections - 35 USC § 102

Claim Rejections - 35 USC § 103

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 1796

6. Claims 1-18, 20-24 and 26-30 rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Takigawa et al. US 5,026,496.
7. The claimed polyolefin are shown at column 1 lines 60+. The acrylate copolymers shown at column 2 lines 33+ read upon the claimed "dispersing component." Component (D) in this patent is seen to fall within the scope of both C) and D) as claimed. The patent further calls for component E). This is a vehicle or medium for the composition disclosed. This is seen to read upon components C) and D) as claimed as well. The patent fails to describe the composition as a "dispersion." The claimed "dispersion" is presumed to be met by this disclosure given that the components are the same as those claimed and they are used in the same relative amounts, see the examples. Rejections under 35 USC 102/103 are appropriate when the claimed components are shown in the art and all limitations are met but for a property or function. In the instant case, it is reasonable to presume that the art anticipates or renders obvious the claimed dispersion. It is further reasonable to presume that the polymeric component described as Component (B) functions as a dispersing compound because these are the same polymeric components claimed. It is further maintained that the acrylate graft polymers described herein are recognized to function as polymeric dispersants.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to /Peter D. Mulcahy/ whose telephone number is 571-272-1107. The examiner can normally be reached on Mon.-Fri. 8-4:30.
